- Git
- Jest
- Linux / Unix
- Test Driven Development
- Agile methodologies

WORK EXPERIENCE

Jan 2023 - Apr 2023
Junior Software Developer
Northcoders

- Collaborated with team of 4 other developers, created SkinScan - Full Stack application, which compares user skin photo, with photos from database, and assess probability of skin cancer. Application used **Vue.js** for UI/front end interface, **Python(PyTorch & Flask)** – for results analysis, **MySQL** database, hosted on **AWS** cloud server.
- Wrote front end and back end applications which connected with SQL databases and **RESTful API's**.
- Worked in a fast-paced high performance tech team.
- Utilised Agile and Scrum methodologies in everyday work.
- Partnered with other developers in pair programming.
- Regular code reviews.
- Developed fully tested applications.

Feb 2022 - Dec 2022
Front End Web Developer
Freelance

- Planned, designed and developed 2 websites, for individual clients, by applying **JavaScript, React, HTML**, and **CSS** skills.
- Remodelled online medical catalogue.
- Communicated with clients through development process, in order to deliver fully satisfying product.
- Created over 10 personal projects in process of learning programming.

EDUCATION

Masters Degree in Business Administration
Warsaw School Of Business And Int. Finances
